Yes	Dec-02	56.6%	32.8%	0.8%	1.6%	7.3%	0.8%

\* All Medicare beneficiaries for whom state Medicaid programs paid Medicare Part A or Part B premiums. This is a commonly-used proxy for the dual eligible population. The buy-in variable may not capture all duals, however, such as some of the medically needy. Some Medicare beneficiaries receiving Medicaid assistance may not have premium buy-in, and conversely, portions of the buy-in population do not receive full Medicaid benefits.

Source: Analysis of Medicare 5% Standard Analytic Files and Denominator File, 1998-2002, by Direct Research, LLC, for the Health Insurance Reform Project based at the George Washington University and funded by the Robert Wood Johnson Foundation.

Note: Individuals were identified as eligible for participation in the Chronic Care Improvement Programs (CCIP) from claims incurred 7/1/1998 to 6/30/1999, using the rules established by HHS for CCIP eligibility.

Note: Columns show status at time of exit from sample. Persons entering hospice prior to death are shown as hospice enrollees, not decedents.

Acknowledgements: The Medicare Payment Advisory Commission provided the Medicare claims data base used and MedPAC staff were collaborators on the project.
